Work Experience

Regeneron Pharmaceuticals Inc.

Product Manager

February 2026 – Present

- Drove automation of data submission workflow, translating user pain points into PRDs, wireframes, process flows and user stories that cut cycle time by 60%, delivering \$125K+ in annual savings.
- Owned end-to-end product delivery for 35-user team, converting discovery into product roadmap with defined KPIs and success metrics across 3 product streams – increasing quarterly feature delivery from 32% to 74% in 3 months.
- Established an impact-vs-effort prioritization framework for a 400+ user Python app suite, refocusing delivery on high-impact features and doubling active usage from 35% to 70%.

Product Manager Co-op

June 2025 – December 2025

- Defined and shipped a real time Tableau + SQL dashboard from consolidated manufacturing data, cutting data reporting turnaround time by 80% for senior leadership.
- Led end-to-end product lifecycle for an inventory management tool – discovery, Figma prototypes, and engineering scoping – automating inventory tracking and cutting manual effort by 37%.
- Grew user retention rate by 28% for a custom application tool by redesigning onboarding and improving user experience.

Eli Lilly Pvt Ltd

Product Analyst

October 2023 – June 2024

- Spearheaded AWS deployment of ML analytics platform (BioTuring), defining cross-team requirements across ML, DevOps, and research, reducing cloud infrastructure operational costs by 30%.
- Orchestrated CI/CD automation for ML model deployment, partnering with engineering to streamline build and release pipelines – cutting model release cycles by 60%.

Nutanix

System Reliability Engineer

January 2021 – October 2023

- Influenced a 22% adoption lift for Prism Central over six months as product specialist, directly informing feature decisions through customer feedback and usage insights.
- Synthesized patterns across 600+ enterprise support cases, translating customer pain points into impact-ranked product recommendations that shaped engineering's backlog and prioritization.
- Led joint technical resolutions for enterprise customers by diagnosing cross-stack issues and aligning Nutanix and partner engineering teams (VMware, Citrix, Microsoft), strengthening product reliability and customer trust.

Education

Duke University | Master's, Engineering Management | GPA: 3.9

August 2024 – December 2025

Honors: Winner, Duke MEM Executive Challenge (2025, 150+ participants)

Relevant Coursework: Product Management, Competitive Strategy, Design Thinking, Marketing Strategy, Finance

VIT University | Bachelor's, Computer Science Engineering | GPA: 3.8

July 2017 – May 2021

Projects

Cartographer – Product Builder

- Defining Cartographer, an AI intelligence layer that lets data consumers navigate data lakes and self-serve technical requirements without engineering intervention; authoring the BRD/PRD informed by discovery with 5 onboarded BA/PM.

Naitiv AI – Product Consultant

- Assessed product-market fit through 120+ user interviews and journey mapping, translating pain points into actionable insights.
- Delivered a GTM action plans from competitive analysis, directly shaping Naitiv AI's MVP scope and product value proposition.

Skills

Product Management: Product Strategy, Roadmapping, Backlog Management, User Research, Requirement Gathering, Prioritization, Agile/Scrum (SAFe), Stakeholder Management, GTM Strategy, A/B Testing, Product Launch, UX/UI, Market Research

Technical & Infrastructure: Python, SQL, Java, Linux, Docker, Kubernetes, CI/CD (Jenkins), Git, AWS, Azure, Virtualization, Distributed Systems, API Integrations, Data Pipelines, Enterprise Software, REST APIs

Tools: Tableau, Spotfire, Power BI, Salesforce CRM, Jira, Confluence, Figma, LucidChart, Claude, Cursor, Lovable, v0
